DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 – 2 and 5 – 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Dravland (US 4,906,243).

With reference to claim 1, Dravland discloses disposable underpants comprising a waist portion and two leg holes (figure 1), an absorbent pad (14) connected to a crotch region on an inside of the underpants and including two sides, a front end (14c) and a rear end (14a), the front end (14c) of the absorbent pad being adapted to locate at a position of wearer's pubis and the rear end (14a) of the absorbent pad being adapted to locate at a position of wearer's buttocks, a width of the rear end (14a) of the absorbent pad being larger than a width of the front end (14c) of the absorbent pad as set forth in figure 1.

As to claim 2, Dravland discloses underpants wherein each of the two leg holes includes a flexible band (20,22) attached to a periphery thereof as set forth in figure 1.

With reference to claim 5, Dravland discloses underpants wherein the rear end of the absorbent pad reaches to the waist portion of the underpants as set forth in figure 1. Application/Control Number: 10/768,047

Art Unit: 3761

With respect to claim 6, Dravland discloses underpants wherein the waist portion includes a flexible band (18) attached to a periphery thereof as set forth in figure 1.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 3 – 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dravland (US 4,906,243).

The difference between Dravland and claim 3 is the provision that the width of the rear end of the absorbent pad is two times the width of the front end of the absorbent pad.

Dravland teaches an absorbent pad where the width of the rear end of the absorbent pad is larger than the width of the front end of the absorbent pad as set forth in figure 1.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the width of the rear end of the absorbent pad in order to determine the most effective product since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable range involves only a level of ordinary skill in the art.

Art Unit: 3761

The difference between Dravland and claim 3 is the provision that the absorbent pad is stitched to the underpants.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to stitch the absorbent pad to the underpants since it has been held that forming in one piece an article which has formerly been formed in two pieces and put together involves only routine skill in the art.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michele Kidwell whose telephone number is 571-272-4935. The examiner can normally be reached on Monday - Friday, 5:30am - 2:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Larry Schwartz can be reached on 571-272-4390. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
